Step 3 Determine size of color square by measuring frame, adding 4 inches to height and width.

Step 4 Determine top left point of gallery; use the level and pencil to draw the top and left lines; affix edge of the painter's tape to the outside of the lines.

Step 5 Using the height calculation from Step 3, start at the bottom edge of the horizontal taped line, measure downward and lightly make a mark with the pencil; use the level and pencil to lightly draw a horizontal line; affix edge of painter's tape just below the horizontal line.

Step 6 Repeat Step 5 for the number of rows desired.
Step 7 Using the width calculation from Step 3, start at the right edge of the vertical taped line, measure to the right and lightly make a mark with the pencil; use the level and pencil to lightly draw a vertical line; affix edge of painter's tape to the right of the vertical line.

Step 8 Repeat Step 7 for the number of columns desired.
Step 9 Using the woven roller, paint the squares.
Step 10 Remove painter's tape; allow paint to dry, following suggested drying time on the can label.
