

COLOR ON THE RISE

Painted Stair Runner

Give a simple wood staircase designer flair with a double stripe of breathtaking color.

You'll Need:

Dutch Boy® Porch & Floor paint (2 colors)	Fine- to medium-grit sandpaper
Angled paint brush	Small carpenter square
Mini woven roller covers and roller frame	Tape measure
Mini trays	Pencil
Painter's tape	Clean, damp cloth

Here's How:

-
- Step 1** Use the sandpaper to sand any rough or glossy surfaces on steps and risers; wipe with the clean, damp cloth to remove dust or debris.
- Step 2** Using the tape measure, determine the width of the painted runner and border by measuring in equally from the outer edges of the first step and lightly marking with the pencil; extend the runner up the staircase using the small carpenter square and pencil.
- Step 3** Affix painter's tape to the outside of the lines on each step and riser, applying pressure to ensure a tight seal.
- Step 4** Starting at the top step, use the mini woven roller, angled brush and border (accent) color to paint between the taped areas of the steps and risers.
- Step 5** Remove the painter's tape while paint is still damp; allow paint to dry for 24 hours.
- Step 6** Select the size of the painter's tape based on preferred width of the runner border.
Tip: The width of the border is determined by the width of the painter's tape; for a narrow accent border, use a narrow painter's tape.
- Step 7** Affix painter's tape, aligning the edge of tape with the inside edge of painted runner, applying pressure to ensure a tight seal with the stairs.
- Step 8** With the mini woven roller, angled brush and main runner color, paint between the taped areas of the stairs and risers.
- Step 9** Remove painter's tape and allow paint to dry, following suggested drying time on the can label.
